PROFESSIONAL SUMMARY

Computer Engineering student with experience in full-stack development, web-based systems, and software project collaboration. Familiar with front-end development, database integration, AI-assisted workflows, debugging, and responsive interface design. Passionate about building practical systems and continuously improving technical skills through academic and personal projects.

EDUCATION

Bachelor of Science in Computer Engineering

Expected Graduation: June 16, 2026

University of Cebu Lapu-Lapu and Mandaue

Mandaue City, Cebu, Philippines

- Placed in the Top 8 in the Engineering Departmental Differential Equations Exam (2023–2024).

CORE SKILLS

Software Development Skills:

- HTML, CSS, JavaScript
- React.js and Node.js fundamentals
- REST APIs and database integration
- Git & GitHub version control

Development Tools:

- VS Code
- GitHub
- ChatGPT, Claude Code, GitHub Copilot

Professional Skills:

- Problem-solving and analytical thinking
- Team collaboration
- Attention to detail
- Adaptability and fast learning
- Organized workflow and task management

Projects & Training Experience

Camilo's Catering SaaS Platform

2026

Personal Full-Stack Development Project

Cebu, Philippines

Technologies: JavaScript, React.js, Node.js, MongoDB, GitHub, AI-Assisted Development Tools

- Developed a multi-tenant catering management web application with modern user interface design and organized digital workflows.
- Worked with front-end and back-end technologies including authentication, database integration, and responsive layouts.
- Applied structured debugging, testing, and optimization practices to improve usability and system reliability.
- Assisted in organizing project structure, feature implementation, and overall system functionality.

ARIAT-Na Smart Tourist Guide and Fare Estimation System

2025-2026

Capstone/Thesis Project

Cebu, Philippines

Technologies: JavaScript, HTML/CSS, QR Code Integration, Responsive Interface Design, GitHub

- Contributed to the development of a smart tourist assistance system that provides fare estimation, route guidance, and itinerary planning for Cebu Province.
- Assisted in designing user-friendly interfaces for kiosk and mobile accessibility.
- Participated in system testing, workflow validation, and functionality improvements to ensure accurate and reliable performance.
- Worked collaboratively in integrating digital tools and structured system processes for tourist convenience.
